## Globex Acquires Property Covering Potential Extension of Monster Property Gold Structure

Rouyn-Noranda, Quebec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1M – Frankfurt, Stuttgart, Berlin, Munich, Xetra Stock Exchanges and GLBFX – OTCQX International) wishes to inform shareholders that it has acquired a continuous block of 26 cells covering a linear north south length of over 9.2 kilometers beginning at the northeastern boundary of the TomaGold Corporation property where Iamgold Corporation recently announced a buy in and work option to earn 50% interest in TomaGold’s property for a combined investment of \$17.75 million (see TomaGold and Iamgold press release dated November 12, 2013).

The TomaGold, Monster Property, encloses a roughly northeast trending quartz vein system which has been outlined by more than two hundred drill holes over a strike length of at least 4.5 kilometers.

Gold within the quartz vein system has produced, in some cases, bonanza gold grades such as recent drill hole M-12-60 which returned 237.6 g/t Au over a 5.7m core length (Source: TomaGold Website).

Globex acquired an initial claim block tying directly onto the northeastern boundary of the TomaGold claim group in the fall of 2012. Last winter, Globex undertook magnetometer and induced polarization surveys and over the summer, geological mapping along what is thought to be the strike extension of the TomaGold mineralized structure. The surveys indicated several well-located anomalies which Globex intends to drill this winter. Globex also expects to complete geophysical surveys over many of the newly, added claims this winter and will undertake mapping and prospecting next summer.

This press release was written by Jack Stoch, P. Geo., President and CEO of Globex in his capacity as a Qualified Person (Q.P.) under NI 43-101.

We Seek Safe Harbour.
