Globex Stakes Lithium-Gold Property in Nova Scotia

Rouyn-Noranda, Quebec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1M – Frankfurt, Stuttgart, Berlin, Munich, Xetra Stock Exchanges and GLBXF – OTCQX International) is pleased to inform shareholders that it has acquired by staking 40 claims covering a strike length of 10 km in Guysborough County, Nova Scotia approximately 200 km northeast of Halifax.

Lithium

In 1999, Nova Scotia Department of Natural Resources personnel discovered a beryl rich pegmatite on the property which returned anomalous amounts of beryllium, caesium, lithium, tantalum and rubidium.

In 2010, stripping exposed a 16 m wide pegmatite in trench #3 which assayed up to 5,360 ppm (0.53%) Li and 1,160 ppm (0.11%) Be among many anomalous assays.

The property was never explored for lithium, as there was no demand at that point in time.

Gold

The Caledonia property was previously explored for gold and rare earths. Historically, gold values of up to 0.24 oz/t Au, 0.91 oz/t Au, 0.60 oz/t Au and 0.28 oz/t Au over lengths of 6 to 18 metres in chip sampling were reported in a property report on Hemany Mines Limited in 1953 by E.P. McDonough BSc., P.Eng.. Globex has not independently confirmed these historical gold assay results.

This press release was written by Jack Stoch, P. Geo., President and CEO of Globex in his capacity as a Qualified Person (Q.P.) under NI 43-101.

We Seek Safe Harbour.
